15M+	40% · 70%	3–5×
Users on gov platform	Performance gain · API reduction	Faster via AI-dev workflow

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5 years of professional experience, including 3+ years specialising in large-scale React/Next.js architecture and AI-integrated product development. Led engineering on India's largest citizen services platform (15M+ users), delivered bilingual Arabic/English enterprise systems across GCC markets, and currently founding RELAYET — an AI business automation startup in production. Proven ability to ship products 3–5× faster using AI-augmented workflows. Available for immediate online interviews and relocation to UAE.

TECHNICAL EXPERTISE

Frontend	React.js, Next.js, Redux Toolkit, RTK Query, Redux-Saga, SSR, PWA
Architecture	Microfrontend (Module Federation), Component Libraries, System Design, Monorepo
AI & Tools	OpenAI GPT-4, Google Gemini, Claude Code, GitHub Copilot, Cursor, CodeX
Backend	Node.js, TypeScript, Express.js, PostgreSQL, RESTful APIs, WebSocket, AWS
UI / Styling	Tailwind CSS, Shadcn/UI, Radix UI, Material UI, Responsive Design, RTL/Arabic UI
QA / DevOps	Jest, Vitest, React Testing Library, Storybook, CI/CD pipelines

PROFESSIONAL EXPERIENCE

Founder & Product Engineer · [RELAYET](#)Dec 2025 – Present

AI-powered business automation platform — WhatsApp conversations 24/7 — live in production

- ▶ AI engine handles orders, product image recognition, dynamic pricing, and automated invoice generation
- ▶ Built complete cafe module in 1 week using AI-augmented workflow (Claude Code, Copilot, Cursor) — traditional timeline 3–4 weeks
- ▶ Multi-language support: Arabic, English, Malayalam, Hindi — designed from the ground up for GCC market expansion
- ▶ Currently fundraising; managing full product lifecycle from architecture to deployment on AWS

Stack: Node.js, TypeScript, Next.js, React, PostgreSQL, Tailwind CSS, OpenAI GPT-4, Google Gemini, WhatsApp Business API, Instagram Graph API, AWS

Senior Frontend Architect · [Information Kerala Mission \(Contract via Kiebot\)](#)Jan 2025 – Present

[KSuite — Government Office Workflow Platform](#)

Serving state departments, government offices, and universities across Kerala

- ▶ Architected microfrontend system using Module Federation enabling 8+ teams to deploy independently with zero coupling
- ▶ Designed and published reusable NPM component library, cutting development time by 30% across all government portals

Stack: React.js, TypeScript, Redux Toolkit, RTK Query, Module Federation

[KSmart — Digital Governance Platform](#)

India's largest citizen services platform — 15M+ registered users, 200+ government services

- ▶ Led architecture of 3 core modules within React microfrontend system, reducing coupling by 60% and enabling independent team deployments
- ▶ Achieved 40% faster page loads (3.2s → 1.9s) and 70% fewer API calls through intelligent caching and code-splitting
- ▶ Collaborated across 8+ cross-functional teams to deliver unified UX for state departments and public portals

Stack: React.js, Next.js, TypeScript, Redux Toolkit, Redux-Saga, Microservices Architecture

Senior Frontend Developer · Kiebot Learning Solutions Pvt Ltd *Jun 2022 – Present*

Kiework HRMS — AI-Powered HR Platform

Enterprise HR system serving 300+ staff across 5 hospitals

- ▶ Built AI HR assistant using OpenAI API enabling natural language queries over real-time HR data
- ▶ Developed mobile-first PWA supporting remote approvals, attendance tracking, and employee self-service

Stack: Next.js, Redux Toolkit, Material UI, OpenAI API, WebSockets, Progressive Web App

TORCAP — Enterprise Bilingual POS System

Multi-location retail platform — 5,000+ daily transactions across 15+ Saudi Arabia locations

- ▶ Developed bilingual Arabic/English POS interface increasing adoption by 45% across GCC locations — direct UAE-market relevance
- ▶ Built offline-first architecture with auto-sync ensuring full reliability during network disruptions

Stack: Next.js, Redux Toolkit, Material UI, Real-time sync, RTL/Arabic UI

AJJANAMANE — Homestay Booking Platform

Client project for boutique homestay business — Next.js SSR implementation

- ▶ Implemented Server-Side Rendering (SSR) reducing load time from 3.2s → 1.3s, improving SEO rankings and UX
- ▶ Optimised caching strategy reducing API calls by 70% for 1,000+ monthly visitors

Stack: Next.js, Material UI, SSR, SEO best practices

EDUCATION & RECOGNITION

Bachelor's Degree in Computer Applications (BCA) *Aug 2018 – Mar 2021*

University of Calicut

🏆 **Employee Recognition Award** — Kiebot Learning Solutions | Published NPM component library used across 8+ production teams

UAE READINESS

- ✅ Bilingual Arabic/English systems — built for GCC markets relocation
- ✅ Open to UAE employment visa sponsorship
- ✅ Available immediately for online interviews &
